

Online Cash Payments

An Alternative to Payment Processors

General Knowledge to Know Beforehand

- Tell customers to wrap money in paper in envelope
- Follow all laws
- Divide responsibilities at your place of business
- This can work with checks too

1. Cash Payment with Accounts

For every account, give an 9-digit alpha-numeric code (X-XXXX-XXXX). There are 101 trillion unique codes that can be made with that combination.

When the consumer pays, he puts his unique code in the envelope

2. Cash Payment for an Online Store

List every product with a unique code, then add accessories at the end.

Example: 1776-1-5

- Product 1776
- Accessory 1 (Yes)
- Color 5 (Purple)

3. Cash-on-delivery

Have the customer pay on delivery

4. Use money orders

5. Direct Bank Transfers
